2012 Office and Industrial Demand Analysis (as of 09/30/2012)

The Office of Economic Development (OED) analyzes the demand it sees for office and industrial space in Clermont County. OED has received 32 inquiries for possible projects as of September 30. We have been able to respond with potential sites or buildings for 8 of those projects (25%). We were unable to respond to 24 projects (75%) due to the lack of appropriate land or buildings.

Answered Leads

Four of the eight projects CED responded to were industrial project leads.

Of the four answered industrial (manufacturing and warehouse) projects we answered, one was looking for an existing building, and three were looking for land for new construction.

The most commonly requested industrial building size was the greater than 100,000 square feet range, with 100% of the requests. The average size request of answered leads was 250,000 SF.

Unanswered Leads

OED had 24 projects (75%) that we could not respond to because of the lack of an appropriate facility. Of the unanswered projects, 23 of the 24 were manufacturing projects and were highly specific, with requests for former chemical or food facilities, rail feasibility, airport access, proximity to interstates, or high ceilings. The average unanswered industrial request was about 97,000 square feet.

Lead Generation

OED receives leads from several sources. The State of Ohio and the Cincinnati USA Partnership has supplied a number of leads, however, we were unable to answer most of them due to specific building needs. The table on the next page illustrates the sources of all leads, broken out by answered and unanswered projects.

Lead Status

For the 2012 leads that OED has submitted sites for, 100% have received site submissions and are reviewing county properties. These leads have the potential to turn into announced projects. Two of the leads are seriously considering Clermont County sites and incentive proposals have been submitted.
